HOSSEIN SHARIFI

Mason, OH | 859.213.6972 | hosseinsharifi71@gmail.com | hosseinsharifii.github.io

RELEVANT EXPERIENCE

Industry Solution Technical - Intern – Dassault Systems **May 2022 - Present**

- Developed and executed in Silico Clinical Trial using physics-based and surrogate data-driven models to treat virtual patients with secondary mitral regurgitation by applying clipping medical device.

Research Assistant – University of Kentucky **August 2018 – Present**

- Developed an open-source multiscale model of cardiovascular function using finite element modeling to study the left ventricular growth and remodeling in response valvular diseases.

Research Assistant - University of Kentucky **August 2016 – May 2018**

- Investigated the load rating of in-service culverts using finite element modeling.

TECHNICAL SKILLS

Computational Mechanics: Finite-element modeling (Explicit and Implicit), Continuum mechanics, Tissue biomechanics, multiscale modeling

Machine Learning: Gaussian Process Regression, Classification, Clustering, Deep learning, Neural network

Software and programming languages: Abaqus, FEniCS project, Python (e.g. NumPy, SciPy, Pandas, scikit-learn, Keras, TensorFlow, Matplotlib, seaborn), MATLAB, HTML, JavaScript

SELECTED CERTIFICATES

- **Machine learning with python**
- **Introduction to Deep Learning & Neural Networks with Keras**
- **Introduction to Computer Vision and Image Processing**
- **Introduction to Data Science in Python**

EDUCATION

University of Kentucky Ph.D. in Mechanical Engineering (2018 – present)

University of Kentucky MS in Civil Engineering (2016 – 2018)
